Module 4 Test Review #2 \_\_\_\_\_

Date: \_\_\_\_\_

Test Date: \_\_\_\_\_

**Multiply.**

$$346 \times 43 = \underline{\hspace{2cm}}$$

**Multiply.**

$$563 \times 214 = \underline{\hspace{2cm}}$$

**Multiply.**

$$1267 \times 214 = \underline{\hspace{2cm}}$$

**Find the sum:**

$$7.55 + 0.002 + 3.391 = \underline{\hspace{2cm}}$$

**Gina has \$12.47. If she earns \$36.18 more, how much will she have in all?**

A computer game started downloading 8.1 minutes ago and needs 24.6 minutes total in order to complete the download. In how many minutes will the game be downloaded?

Find the difference:

$$12.4 - 5 =$$

Evaluate the expression.

$$[8 + (4 \times 5)] \div 7$$

Write a mathematical expression for the following:

The quotient of 24 and 6 time the sum of 4 and 5

Review: Solve.

$$3,825 + 4,367 = \underline{\hspace{2cm}}$$

Review: Solve.

$$7,435 - 5,546 = \underline{\hspace{2cm}}$$
